

A black and white micrograph showing a large, irregularly shaped mineral specimen. The specimen has a complex internal texture with various shades of gray and some lighter, fibrous-looking regions. It is surrounded by a dark background filled with numerous small, bright, circular spots, likely representing other mineral grains or inclusions. A scale bar in the bottom left corner indicates a length of 100 μm. A label '187-1-116_B' is positioned on the right side of the specimen, with a small blue dot located just below it.
