

A scanning electron micrograph (SEM) showing two mineral grains against a dark background. The grain on the left is smaller and more irregularly shaped. The grain on the right is larger and more elongated. Two blue dots mark specific regions on the larger grain, labeled '187-1-120_reg2' and '187-1-120_reg1'. A scale bar in the bottom left corner indicates 100 μm.

187-1-120_reg2
